

# Designing A Functional Document Processor

What is a document, and what do I do with it?

Alperen Keles

Documents with common substructures exist.

Documents with common substructures exist.

We are currently **bad** at exploiting such substructures.

Documents with common substructures exist.

We are currently bad at exploiting such substructures.

I am working on **exploiting them**, I am at the **very beginning** of that journey, and I would like **your help** with it.

**What is a document?**

**A sequence of letters arbitrarily placed on a 2-dimensional plane.**

**What is a document?**

~~A sequence of letters arbitrarily placed~~ on a 2-dimensional  
plane.

**What is a document?**

~~A sequence of letters arbitrarily placed~~ on a 2-dimensional plane.

**Projection of abstract concepts** placed on a 2-dimensional plane.

# What is a document?

~~A sequence of letters arbitrarily placed~~ on a 2-dimensional plane.

Projection of abstract concepts placed on a 2-dimensional plane with some **visual structure that conveys relations between the concepts.**

**What is a document?**

**Projection of abstract concepts placed on a 2-dimensional plane with some visual structure that conveys relations between the concepts.**

What is a document?

Projection of abstract concepts placed on a 2-dimensional plane with some visual structure that conveys relations between the concepts.

**What kind of relations does the visual structure convey?**

**What kind of relations does the visual structure convey?**

- Sequencing**

**What kind of relations does the visual structure convey?**

**- Sequencing**

**A word is a sequence of letters.**

**A sentence is a sequence of words.**

**A paragraph is a sequence of sentences.**

**...**

**What kind of relations does the visual structure convey?**

- Sequencing
- Grouping

**A word is a sequence of letters.**

**A sentence is a sequence of words.**

**A paragraph is a sequence of sentences.**

**...**

# What kind of relations does the visual structure convey?

- Sequencing
- Grouping
- Hierarchy

A word is a sequence of letters.

A sentence is a sequence of words.

A paragraph is a sequence of sentences.

...

**How do we create documents?**

**How do we create documents?**

`create :: [Concept] → 2D-Plane`

**How do we create documents?**

**create :: [Concept] → 2D-Plane**

# A New Cross Paradigm Editor

Tail: A Typed and Structured Document Editor<sup>[1]</sup>

1. Create document templates.

[1] <https://cvdl-editor.vercel.app/>

# A New Cross Paradigm Editor

Tail: A Typed and Structured Document Editor<sup>[1]</sup>

1. Create document templates.
2. Given a template, you can derive an editor for it.
3. Given an editor, you can create a document with it.

[1] <https://cvdl-editor.vercel.app/>

**A New Cross Paradigm Editor**
